RE; LightSquared proposal

To whom it may concern,

As a small business owner in the land surveying field, I am amazed that the FCC would consider doing anything that might be detrimental to our ability to fully use the expensive equipment we have previously purchased. The use of our GPS equipment has helped to decrease what the public has to pay for their survey work. If as I understand the LightSquared proposal, there would be a very negative impact on our ability to use our GPS equipment. The State of Wisconsin and many other states have spend large amount of public funds to improve the GPS equipment function. Please do not allow this project to move forward. Thank you for your consideration.

Robert F. Reider, PLS
